WHAT A WORLD

2020 was unlike any year we have seen. We feel fortunate to have found such a loving community which allows us to do what we love: make awesome toys and bring joy to children and grown-ups alike. We have worked hard to make this year's collection cooler and more creative than the years before. We know you are going to find something you love and want to take home.

Without further ado, let's get into the wild world of our unique wooden toys.

RUNNER

For this brand new launch, we tried something new: mixing our usual vintage proportions and attitude with a futuristic color scheme. We then added extra bits of spice: full headlight front grill, extreme suspension travel, and a striking paint color. (All are in our imaginations - no batteries on this toy) Makes us wish we'd see a full-scale one! Rain or shine this truck is ready for an adventure.

GET OUTDOORS, AND FIND ADVENTURE

We have a whole new line of Candycars® that harkens back to adventuring, camping, and all things wilderness. The Mules are mini rough-and-tumble trucks with a magnetic hitch and spare tire. They are perfect for hauling around our new trailers, the Rosebud and Pinecone.

We couldn't just stop there, so to complete our camping line we created two roadtrip-ready vehicles. These RV's are for those who need a few extra amenities while on the trail. Trek on out to any national park in style with our Yosemite and Arizona. Don't forget your lantern!
