CATÁLOGO GENERAL

Più di cento anni fa Enrico Guzzini ha fondato la Fratelli Guzzini con un'idea di fondo che è ancora oggi la nostra: innovazione. Oggi questo principio è per noi un caposaldo a cui abbiamo aggiunto ulteriori valori che ci hanno permesso di evolvere verso le aspettative di un "futuro" da conquistare giorno per giorno.

Internationalità, Territorio, Design, Comunicazione, Foodesign, Tecnologia sono ambiti di una consapevolezza imprenditoriale scaturita grazie ad un lavoro di management e di relazioni con un mondo che diviene sempre più attento alla qualità del prodotto di Design. E noi, tra le prime aziende iscritte all'ADI già negli anni '60, possiamo dimostrarlo una volta di più in questo "Catalogo Generale" che di progetto in progetto, di oggetto in oggetto, presenta le più recenti innovazioni che ci rendono orgogliosi della nostra storia e del nostro paese, l'Italia. Essere imprenditori oggi, ma soprattutto Impresa che ha portato la Cultura di Design nelle Marche e da qui verso il mondo dimostra che non vi può essere sviluppo economico senza **responsabilità sociale**. Non è infatti un caso che la Fratelli Guzzini nasce sulle tracce di un viaggio in Argentina che nel 1911 tanto appassionò Enrico Guzzini, il suo fondatore.

Oggi, in conclusione, vogliamo condividere una storia di Design con voi che da sempre premia il nostro lavoro. Questo catalogo, ricco di oggetti, identità e cultura d'Impresa, è un esempio concreto di ciò che siamo e che vorremmo essere sempre: cittadini del mondo. Nulla di più, ma neanche nulla di meno.

More than one hundred years ago, Enrico Guzzini founded Fratelli Guzzini with a fundamental idea which is still ours today: innovation. Today, this principle is for us a cornerstone to which we have added values that have allowed us to evolve towards future expectations to achieve day by day.

Internationality, Territory, Design, Communication, Foodesign, Technology are areas of entrepreneurial awareness resulting from management work and relationships with a world that is becoming increasingly attentive to the quality of Design products. We are among the first companies to be registered to ADI, the Industrial Design Association, since the 1960's and we can prove it once again with this "General Catalogue", which from project to project and from object to object, presents the most recent innovations that makes us proud of our history and our country, Italy. Being entrepreneurs, but more importantly a company that has brought Design Culture in the Marche region and from here to all over the world, demonstrates that there cannot be economic development without **social responsibility**. In fact, it is no coincidence that Fratelli Guzzini was inspired by a trip to Argentina in 1911, that so much fascinated its founder Enrico Guzzini. In conclusion, today we wish to share the history of Design with you, as you have always awarded our work. This catalogue, rich with objects, corporate culture and identity, is a specific example of who we are and what we wish to always be: citizens of the world. Nothing more, but nothing less.

Il y a plus de cent ans, Enrico Guzzini fonda la société Fratelli Guzzini avec une idée de fond qui est encore à présent la notre : l'innovation. Aujourd'hui, ce principe est pour nous un fondement auquel nous avons ajouté des valeurs ultérieures qui nous ont permis d'évoluer vers les attentes d'un « avenir » à conquérir jour après jour.

Internationalité, Territoire, Design, Communication, Foodesign, Technologie sont les domaines d'une conscience managériale née grâce à un travail de management et de relations avec un monde qui devient de plus en plus attentif à la qualité du produit de Design. Et nous, qui faisons partie des premières entreprises inscrites à l'ADI déjà depuis les années 1960, nous pouvons le démontrer une fois de plus dans ce « Catalogue Général » qui, de projet en projet, d'objet en objet, présente les innovations les plus récentes qui nous rendent orgueilleux de notre histoire et de notre pays, l'Italie. Être des entrepreneurs aujourd'hui, mais surtout une Entreprise qui a porté la Culture de Design dans la région des Marches et ensuite dans le monde, démontre qu'il ne peut y avoir de développement économique sans **responsabilité sociale**. En effet, ce n'est pas un hasard que la société Fratelli Guzzini soit née sur les traces d'un voyage en Argentine qu'en 1911 passionna tant Enrico Guzzini, son fondateur.

Aujourd'hui, en conclusion, nous souhaitons partager une histoire de Design avec vous qui, depuis toujours, récompensez notre travail. Ce catalogue, riche d'objets, d'identité et de culture d'entreprise, est un exemple concret de ce que nous sommes et de ce que nous souhaiterions continuer à être: des citoyens du monde. Rien de plus, mais aussi rien de moins.

Vor mehr als 100 Jahren Enrico Guzzini das Unternehmen Fratelli Guzzini mit einer Grundidee, die für uns auch noch heute gilt: Innovation. Heute bildet dieser Grundsatz für uns einen Schwerpunkt, dem wir weitere Werte hinzufügen, über die es möglich ist, uns den Ansprüchen einer tagtäglich zu erwerbenden „Zukunft“ entsprechend weiterzuentwickeln.

Internationalität, Territorium, Design, Kommunikation, Foodesign, Technologie sind die Bereiche eines unternehmerischen Bewusstseins, das aus Management und der Beziehungen mit einer Welt entwickelt wurde, die immer mehr Wert auf die Qualität des Produktdesigns legt. In dem vorliegenden „Hauptkatalog“ untermauert unser Unternehmen, das bereits in den 60er Jahren zu den ersten in der ADI eingeschrieben zählte, diesen Vorsatz. Von Projekt zu Projekt und von Gegenstand zu Gegenstand werden hier die neusten Innovationen vorgestellt, welche uns stolz auf unsere Geschichte und auf unser Land, Italien, machen. Ein Unternehmen (besonders eines Unternehmens, welche das Design für die Marken und über diese in die Welt einführt) kann heute nur erfolgreich sein, wenn die wirtschaftliche Entwicklung einhergeht mit **sozialer Verantwortung**. Es ist kein Zufall, dass Fratelli Guzzini in Folge einer Reise nach Argentinien gegründet wird. Ein Land, das den Gründer Enrico Guzzini im Jahr 1911 begeisterte.

Belohnt wird unsere Arbeit durch Sie und daher möchten wir heute zum Abschluss mit Ihnen eine Geschichte des Designs teilen. Dieser Katalog reich an Gegenständen, mit dem Selbstverständnis und der Kultur des Unternehmens ist ein konkretes Beispiel dessen, was wir sind und was wir immer sein möchten: Weltbürger. Nicht mehr aber auch nichts weniger.

Hace más de cien años Enrico Guzzini fundó la Fratelli Guzzini con una idea de fondo que aún nos pertenece: innovación. Hoy este principio es un baluarte al que hemos añadido otros valores que nos han permitido progresar hacia las expectativas de un "futuro" que hay que conquistar día a día.

Internacionalidad, Territorio, Diseño, Comunicación, Foodesign, Tecnología son ámbitos de una conciencia empresarial obtenida gracias a un trabajo de gestión y de relaciones con un mundo que cada vez presta más atención a la calidad del producto de Diseño. Y nosotros, que nos colocamos entre las primeras empresas inscritas en el ADI (Asociación para el Diseño Industrial) ya en los años '60, podemos demostrarlo una vez más con este "Catálogo General", que de proyecto en proyecto, de objeto en objeto, presenta las más recientes innovaciones que nos hacen enorgullecer de nuestra historia y de nuestro país, Italia. Ser empresarios en nuestros tiempos, pero sobre todo, ser empresa que ha llevado la cultura del Diseño a la región "Marche" y desde aquí hacia el mundo, demuestra que no puede existir desarrollo económico sin **responsabilidad social**. De hecho, no es una casualidad que Fratelli Guzzini haya nacido siguiendo las huellas de un viaje en Argentina, que en el 1911 apasionó a Enrico Guzzini, su fundador.

Para concluir, hoy queremos compartir una historia de Diseño con ustedes, que desde siempre premian nuestro trabajo. Este catálogo, cargado de objetos, de identidad y de cultura de la Empresa, es un ejemplo concreto de lo que somos y de lo que queremos ser siempre. Ciudadanos del mundo. Nada más, pero tampoco nada menos.

Oggi, per un'azienda attenta alle evoluzioni del gusto e a quelle indispensabili della tecnologia, è più che mai importante porsi obiettivi concreti. Prima di tutto la qualità del prodotto. Fratelli Guzzini è stata la prima azienda al mondo a lavorare i materiali acrilici già nel 1938, e da allora la cultura del progettare e produrre solo oggetti di alta qualità è divenuta una vocazione che coinvolge tutti i settori aziendali al fine di offrire oggetti caratterizzati da elevata resistenza, durata e bellezza.

Tutti i prodotti nascono con un doppio itinerario di garanzia, relativo alla origine dei materiali e ai controlli lungo tutta la filiera produttiva. A partire dalle materie prime, derivate da materia vergine e non di seconda scelta oppure da scarti di produzione, passando per il processo produttivo, realizzato nello stabilimento di Recanati, dove nascono articoli sempre controllati nelle componenti, nelle tecnologie e nelle lavorazioni.

Questo rigore si concretizza con l'ottenimento sin dal 1996 della certificazione del sistema qualità secondo la norma ISO 9001, e nella ben più importante collaborazione con vari organismi di certificazione internazionali di parte terza, esperti e indipendenti, che garantiscono una sorveglianza continua. Ne è un esempio l'Istituto Italiano dei Plastici (IIP) che, con il marchio MPI, certifica l'idoneità al contatto con gli alimenti dei prodotti in materiale plastico qualificando la Fratelli Guzzini come unica azienda nel settore, e nel mondo, in grado di fornire ai consumatori i più alti standard qualitativi e di sicurezza.

Sono sottoposti allo stesso processo di verifica tutti i componenti realizzati in materiali non plastici provenienti da aree al di fuori dei confini italiani. Essi nascono, infatti, da collaborazioni con fornitori selezionati ed operanti in paesi esteri che hanno il medesimo livello qualitativo, le stesse garanzie di sicurezza e stringenti procedure di controllo e certificazione europee.

E' su questa attitudine alla qualità senza mediazioni, che si è costruita la storia di successo di uno dei marchi riconosciuti nel mondo come testimone del Made in Italy.

Nowadays, it is very important to set real objectives for those companies attentive to the evolution of taste and, most importantly, technology. The first one would be the quality of products. Fratelli Guzzini was the first company to start working with acrylic materials in 1938 and, since then, the design and manufacture of high quality products has been the vocation of all of the company's sectors in order to supply highly resistant, lasting and beautiful objects.

All of our products have double guarantees regarding the origin of the materials and the inspections along the production chain. The raw materials derive from unprocessed material rather than from seconds or production waste and the manufacturing process takes place in the Recanati plant, where the components, the technology and the processing of products are always checked.

Such rigour has been confirmed by the ISO 9001 certification of the quality system obtained in 1996, and by our collaboration with a number of independent expert certifying organisations that grant continuous monitoring. The Istituto Italiano dei Plastici (IIP) is an example: its MPI mark certifies the suitability of plastic products to be used for food, thus qualifying Fratelli Guzzini as the only company in the industry and worldwide to offer the highest qualitative and safety standards.

Non-plastic products from outside Italy undergo the same verification process, as they are created in collaboration with foreign selected suppliers with our same qualitative level, safety guarantees and strict European certifications and inspection procedures.

This is precisely the kind of quality at the basis of the success of one of the brands recognised as representative of the Made in Italy.

Aujourd'hui, pour une entreprise attentive à l'évolution du goût et à l'avancement indispensable de la technologie, il est plus que jamais important de se fixer des objectifs concrets. Avant tout, la qualité du produit.

Dès 1938, Fratelli Guzzini a été la première entreprise au monde à travailler les matériaux acryliques et depuis, la culture de ne concevoir et de ne fabriquer que des produits de haute qualité est devenue une vocation qui concerne tous les secteurs de l'entreprise afin d'offrir des objets caractérisés par leur résistance élevée, leur durée et leur beauté.

Tous les produits naissent avec un double itinéraire de garantie relatif à l'origine des matériaux et aux contrôles effectués tout au long de la filière de production. À partir des matières premières issues de la matière vierge et non du second choix ou de déchets de production, en passant par le processus de production réalisé au sein des établissements de Recanati, lieu de naissance des produits dont les composants, les technologies et les processus de transformation sont constamment contrôlés.

Cette rigueur se concrétise à travers l'obtention, dès 1996, de la certification du système qualité selon la norme ISO 9001 et la bien plus importante collaboration avec différents organismes tiers de certification, experts et indépendants qui garantissent une surveillance continue. L'Institut Italien des Plastiques (IIP), qui en est un exemple, certifie avec la marque MPI, l'aptitude des produits en matière plastique au contact avec les aliments, en qualifiant l'entreprise Fratelli Guzzini comme étant la seule société, du secteur et au monde, à même de fournir les standards de qualité et de sécurité les plus élevés aux consommateurs.

Tous les composants en matériaux non plastiques qui proviennent de zones situées hors des frontières italiennes sont soumis à la même procédure de vérification. Ils sont issus en effet des collaborations avec des fournisseurs sélectionnés qui travaillent dans des pays étrangers avec le même niveau de qualité, les mêmes garanties de sécurité et de strictes procédures de contrôle et de certification européennes.

C'est sur cette attitude à la qualité sans médiations que l'histoire du succès de l'une des marques reconnues dans le monde entier comme étant un témoin du Made in Italy s'est construite.

Heutzutage ist es für ein Unternehmen, das sich intensiv mit der Evolution von Vorlieben sowie den unerlässlichen technologischen Entwicklungen befasst, ausgesprochen wichtig, konkrete Ziel zu verfolgen. An erster Stelle steht hierbei die Qualität des Produkts.

Fratelli Guzzini war das erste Unternehmen weltweit, das bereits 1938 Materialien aus Acryl verarbeitete. Seitdem wurde die Kultur, ausschließlich hochwertige Produkte zu entwickeln und herzustellen, zu einer Berufung, die alle innerbetrieblichen Sektoren einbezieht, um Objekte von höchster Widerstandfähigkeit, Lebensdauer und Schönheit anbieten zu können.

Bei der Entstehung aller Produkte kommen zwei Arten der Garantie zum Einsatz: hinsichtlich der Herkunft der Materialien und der Kontrollen im Verlauf der Produktionskette. Ausgehend von den Rohstoffen, bei denen es sich um Materialien in ihrem Urzustand und nicht um solche zweiter Wahl oder Produktionsabfälle handelt, bis zum Herstellungsprozess im Werk von Recanati, in dem Erzeugnisse entstehen, deren Komponenten, Technologien und Bearbeitungen stets kontrolliert werden.

Diese Disziplin fand ihre Realisierung durch das Erreichen der Zertifizierung der Qualitätsmanagementnorm ISO 9001 seit 1996 sowie in der noch wichtigeren Zusammenarbeit mit diversen dritten erfahrenen und unabhängigen Zertifizierungsbehörden, die eine kontinuierliche Überwachung gewährleisten. Ein Beispiel hierfür ist das Istituto Italiano dei Plastici (IIP) (Italienisches Institut für Kunststoffe), das mit dem Zeichen MPI die Eignung von Kunststoffen für den Kontakt mit Lebensmitteln zertifiziert, und welches dem Unternehmen Fratelli Guzzini als einzigem auf dem Sektor die höchsten Qualitäts- und Sicherheitsstandards für die Verbraucher bescheinigt.

Alle Komponenten, die nicht aus Kunststoff gefertigt wurden und aus Gebieten außerhalb der italienischen Grenzen bezogen werden, unterliegen denselben Prüfungsverfahren. Diese Produkte entstehen in Zusammenarbeit mit ausgesuchten Lieferanten im Ausland und weisen dasselbe Qualitätsniveau und dieselben Sicherheitsgarantien auf. Zudem werden sie denselben strengen Kontroll- und Zertifizierungsverfahren unterzogen, die für Europa gelten.

Dank dieser kompromisslosen Einstellung zur Qualität konnte die Erfolgsgeschichte einer der weltweit als Zeuge des Made in Italy renommierten Marken entstehen.

En la actualidad, para una empresa atenta a las evoluciones del gusto y a aquellas indispensables de la tecnología, es más que importante marcarse objetivos concretos. Por encima de todo, la calidad del producto. Fratelli Guzzini ha sido la primera empresa en el mundo en trabajar los materiales acrílicos, ya desde 1938; desde entonces, la cultura de proyectar y producir solo productos de alta calidad se ha convertido en una vocación presente en todos los sectores de la empresa a fin de ofrecer objetos caracterizados por una elevada resistencia, duración y belleza.

Todos los productos nacen con un doble itinerario de garantía, correspondiente al origen de los materiales y a los controles a lo largo de toda la cadena productiva: a partir de las materias primas, derivadas de materias vírgenes y no de segunda calidad o de desechos de producción, pasando por el proceso productivo, realizado en la planta de Recanati, donde nacen productos cuyos componentes, tecnologías y mecanizados son en todo momento controlados.

Este rigor se concretó con la obtención, en 1996, del certificado del sistema de calidad según la norma ISO 9001, y con la importante colaboración con varios organismos de certificación a través de terceros, expertos e independientes, que garantizan un control continuo. Un ejemplo de ello es el Istituto Italiano dei Plastici (IIP) que, con la marca MPI, certifica la idoneidad para el contacto con los alimentos de los productos de material plástico calificando a Fratelli Guzzini como la única empresa en el sector, y en el mundo, capaz de suministrar a los consumidores los estándares de calidad y seguridad más elevados.

También son sometidos a este mismo proceso de control todos los componentes realizados con materiales no plásticos procedentes de áreas situadas más allá de las fronteras italianas. Éstos nacen, de hecho, de colaboraciones con proveedores seleccionados que trabajan en países extranjeros y comparten el nivel de calidad, las garantías de seguridad y los rigurosos procesos de control y certificación europeos.

Justamente sobre esta actitud respecto de la calidad sin mediaciones ha ido construyéndose la historia de éxito de una de las marcas reconocidas en el mundo entero como prueba del Made in Italy.
