The design of the Mason Cash mixing bowl has endured the test of time to become something of a design classic.

The bowls are made from high quality, chip-resistant earthenware, making them heavy enough to counter the tendency to move during manual mixing, yet light enough to hold comfortably in one arm during the process.

The patterned exterior is designed to help cooks grip the bowl, whilst also enhancing its timeless elegance.

The shape allows cooks to hold the bowl in one arm easily while the other can be used for beating the mixture, whereas the wide, shallow shape is ideal for kneading dough.

Finally, the white interior makes it easy for users to see the colour and consistency of the mixture ensuring the perfect result.

Today, the design and colour simply identifies the bowl as a Mason Cash classic. While the bowl has been in use since 1901, it is still practical for today's kitchen, whether professional or in the home.

## 

# BAKEWARE

Mason Cash Cane Bakers were first manufactured in the early 19th century. The distinctive shape and embossed patterns on the bakeware has barely changed since the mid 1800s, and continue to be a family and restaurant favourite today. Made from high quality, chip-resistant stoneware, the round and oval shaped bakers are tapered for an easy grip. With a selection of sizes they are ideal for individual or family portions of pies, crumbles, desserts or vegetable dishes.

2001.063 Ctn.6

### Did you know?

The round and oval bakers were popularly nicknamed 'nappies' back in the 1850s. This originates from the old English name for dish, hnaep [pronounced nap].

### 

## PUDDING BASIN

As classic and recognisable as the mixing bowls, no household would be complete without the traditional white Mason Cash Pudding Basin. Perfect for steaming puddings, general prep use, or serving soups and cereals. The Mason Cash pudding basins blend high quality with a perfect functional design. The quality is so high that the British Royal Household gives Christmas puddings presented in Mason Cash Pudding Basins to their staff every year.

### **KEY DESIGN FEATURES**

### 

Once a pudding mixture is packed into a pudding basin, the basin needs to be sealed by tying a lid [usually made from greaseproof paper and foil] around the rim before steaming.

A handle must also be tied to this lid, and the protruding rim of the Mason Cash basins allow the lid to be tied and maintained throughout the steaming process and whilst being lifted in and out of a steamer.

### 

The rounded, smooth shape of the Mason Cash Pudding Basins give puddings their distinct shape, but the shape also allows for an easy release after being steamed for several hours.

### 

When a pudding basin is placed into a steamer or pan of simmering water, air bubbles will form underneath it as the temperature reaches boiling point. These bubbles or pockets will find the easiest route to escape, usually straight up, which can cause some basins to tip inside a steamer.

The Mason Cash Pudding Basins feature three vents in each base which allow trapped bubbles or pockets of air to escape easily when steaming, eliminating any need for a trivet or saucer to be placed in the pot beforehand.

# BAKER LANE

Oven to Tableware

The Baker Lane ovenware dishes have been designed to bake and serve perfectly sized portions of all your favourite meals. The quality stoneware heats up gradually for an even bake, while the vented bases and high, steep sides further enhance heat distribution throughout the dish. Each piece has been sized perfectly for the meals for which they are designed. For example, the Lasagne dish has been designed to perfectly fit lasagne sheets for a family of four.

Brighten up your kitchen with Mason Cash Hen Nests. Inspired by Great British farm yards, each hen nest has been crafted and painted in rustic styles. Made from chip resistant, high quality ceramic they are perfect for storing eggs but also act as a kitchen tidy.

### Jerracotta BREAD BAKING

Baking Bread in porous clay has been practiced for centuries, and has been perfected by Mason Cash.

The secret of baking in terracotta is simple - the terracotta must be unglazed. Unglazed terracotta is porous and will draw in moisture from whatever touches its surface.

When bread dough touches the surface, it will draw or wick moisture away from it, giving a crispier crust when baked.

The terracotta bread baking range offers unique products with unique features:

Our Bread Baking Set features our traditional size 12 mixing bowl with a proving lid that forms an airtight seal for dough to rise in. The lid can then be used as a baking stone.

# PERFECT PIE

The Mason Cash Perfect Pie Range has been developed to provide perfect baking results for any home baker and to eliminate common problems in pie baking such as soggy bottoms, burnt bases and pastry shrinkage. With a series of unique embossments, the Perfect Pie Dishes help to prevent these culinary catastrophes, with perfect results every time.

The Perfect Pie Range is made from fine quality stoneware which conducts heat slowly and evenly. The dishes therefore heat up gradually, building and spreading the heat throughout, resulting in perfectly-baked, browned pie bases and evenly-cooked pie fillings.

**KEY DESIGN FEATURES** 

### 

A pie will bake more evenly when placed flat on a baking tray when in the oven. However, air must be allowed to circulate underneath the dish to allow for perfect heat conduction. The Mason Cash Perfect Pie dishes feature a unique base design with raised feet to allow heat circulation and ventilation.

### 

Each dish features an embossed pattern on each rim which helps pastry to grip the dish. This helps to prevent pastry from shrinking and slumping back inside the dish.

### THE EMBOSSED INTERIOR \*\*\*\*

The Mason Cash Perfect Pie dishes feature embossed corrugated ridges on the inside of each dish. These ridges provide improved heat distribution to pastry allowing a more even bake, better browning and easier pastry release once baked.

### PERFECT PIE

Collection

The Perfect Pie dishes are complemented by a series of accessories to help make and bake the perfect pastry. From pie birds to baking beans, we do everything we can to help your customers bake the most perfect of pies. Remember, we have lots of recipes and tutorials on our website, so we'll be with your customers every step of the way.

## CLAY COOKER

Clay Cooker 36 x 23 x 13cm, Giftbox

2001.410

Ctn.4

Cooking in a terracotta pot ensures tasty, tender results every time. The Mason Cash Clay Cooker is really easy to use. Simply soak it in cold water for 10 minutes, place your meat and vegetables in it and place it in a cold oven before heating. As the oven heats, the food cooks slowly in its own juices, baking and steaming the food at the same time. The longer that you cook the meat, the more tender it becomes. Vitamins and nutrients are preserved inside the pot and all of the food is infused with fantastic flavours, producing a healthy, tender joint without adding any fat or oils.

MASON CA

# TAGINES

Lots of recipes online at www.masoncash.co.uk

The Mason Cash Fireclay Tagine is made from high quality stove safe terracotta. The lid is unglazed which allows you to soak it in water before putting in the oven. This creates steam which ensures meat and vegetables are kept moist and are continually infused with flavours and nutrients.

Can be used on Stove Top

Terracotta Stovetop Tagine Casserole 1.5 Litres, 27 x 27 x 20cm Unglazed terracotta

# INNOVATIVE UTENSILS

The Mason Cash Innovative Kitchen Utensils range has been designed for multi-functionality and comfort.

Each one of the beech wood tools is perfect for the multiple tasks in hand.

## INNOVATIVE UTENSILS

The Mason Cash Innovative Kitchen Utensils range has been designed for multi-functionality and comfort. Each one of the beech wood tools is perfect for the multiple tasks in hand. For instance, the slotted spoon is ideal for stirring and skimming stews or boiled vegetables and doubles up as an egg separator when preparing to bake. The pastry brush is great for basting meat or pastry and has a handy fork on one end to whisk eggs and milk for glazing pastry, but also makes a handy pastry pricker and pastry crimper. Even our stainless steel balloon whisk has a handy reamer on the handle for adding citrus flavours to bakes and dinners.

## Elite

B

# WOODEN UTENSILS

A

The curved organic shapes of Mason Cash Elite Wooden Utensils offer a stylish finish to the most traditional of kitchen tools. Each tool has been ergonomically designed and crafted and is perfect for the task in hand, with either a grooved thumb rest for additional comfort or silicone ends. Each item is made from environment friendly FSC approved beech wood.

#### Did you Know?

The Mason Cash Mixing Bowl and Pudding Basin sizes are often referred to by their original kiln numbers, such as a size 12 mixing bowl or a size 36 pudding basin. These are not references to imperial or metric measurements, they are simply the quantities of items that could fit on a shelf inside a firing kiln. Twelve size 12 mixing bowls or thirty six size 36 pudding basins could be fired on a shelf inside a kiln. Remember, step by step guides on how to steam puddings and get the best baking results from all Mason Cash items are available on our website. www.masoncash.co.uk
