

2020 PRODUCT CATALOG

It was 1990 when the Microplane® rasp was invented by brothers Richard and Jeff Grace, founders of Grace Manufacturing, Inc., in Arkansas as an innovative woodworking tool designed to rapidly smooth and shape wood using razor-sharp teeth. In 1994, just four years later, a Canadian homemaker, frustrated by how quickly her kitchen grater blades dulled, grabbed the rasp from her husband's woodworking tool cache and was amazed at how cleanly and efficiently it created citrus zest for her orange cake recipe. Extremely sharp teeth, designed for low-effort lumber cutting and smooth, precise wood shaving were exceptionally effective for grating orange citrus zest without removing the pith. This "eureka" discovery, more than 25 years ago, marked Microplane's transition from the woodshop to the kitchen.

At first, the company expressed disbelief that their rasp, a highly functional, serious tool for woodworking was being increasingly purchased by home cooks to zest citrus fruits and grate hard cheeses. Nonetheless, the success of the original Microplane in the kitchen has led to the launch of many other expertly engineered, premium kitchen gadgets from Microplane. Today, Microplane designs and manufactures over 40 kitchen tools and gadgets.

Why Microplane?

Used and supported by professional chefs worldwide

Long lasting, ultra sharp, stainless steel blades

Blades made in the USA

Reusable protective covers for easy storage

Why is sharper better?

Food is grated or zested without ripping or tearing which improves the look of the final dish

Food is grated or zested without bruising which improves flavor and aroma

Less pressure is required while grating - making the task faster and more efficient
