LIGHTS TO INSPIRE

## Studio Snowpuppe

INSPIRED BY NATURE WE REINTERPRET IN A MODERN KEY THE ANCIENT ART OF ORIGAMI

Architect Nellianna van den Baard and Industrial designer Kenneth Veenenbos, together they design, produce and distribute handmade lamps in small series, using natural materials such as paper and wood.

Since 2010 Studio Snowpuppe is making origami lamps by hand on a small but professional scale. The lampshades diffuse a smooth light while making a great visual impact. The high quality paper is produced in Europe and filters the LED bulbs into a cosy, warm glow at home or at work. Our aim is to consume sustainably and respect life, our surroundings and ourselves. The impact on the environment is minimized by using basic, lightweight materials and smart, folded distributing.
